ANUSH MN

Computer Science and Engineering Undergraduate | Aspiring Software Developer

Hassan, Karnataka, India | anushmn2005@gmail.com
github.com/Anushm-n | LinkedIn Profile

PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate with hands-on project experience in web development, Python applications, Android development and database-backed systems. Familiar with C, Java, Python, JavaScript, PHP, MySQL, Flask and Node.js. Interested in building practical software and AI-assisted applications.

EDUCATION

Bachelor of Engineering - Computer Science and Engineering | Currently pursuing

Government Engineering College, Mosalehosahalli, Hassan, Karnataka | Visvesvaraya Technological University (VTU)

TECHNICAL SKILLS

Programming: C, Java, Python

Web: HTML5, CSS3, JavaScript, PHP

Backend and Database: Python Flask, Node.js, Express.js, MySQL, SQL

Tools and Platforms: Visual Studio Code, Git, GitHub, XAMPP, MySQL Workbench, Android Studio

EXPERIENCE

Web Technologies Intern | Vstand4U Technologies

Gained practical exposure to frontend web development using HTML, CSS and JavaScript; worked with responsive user-interface concepts, debugging and basic backend/database connectivity.

SELECTED PROJECTS

AegisRecover AI - AI-Assisted Digital Data Recovery

Technologies: Python, Flask, HTML, CSS, JavaScript, Gemini AI

Developed a prototype workflow to analyze damaged storage images and visualize recovery statistics. Explored pattern-based forensic indicators and AI-assisted analysis/reporting.

Smart Campus 360 - Campus Navigation and Services

Technologies: HTML, CSS, JavaScript, Python, Database Technologies

Designed an integrated campus platform concept covering room navigation, lost-and-found and canteen pre-booking; planned graph-based route guidance.

AI Scam Message Detector

Technologies: Android Studio, Kotlin

Worked on an Android prototype to identify suspicious SMS messages; explored SMS-receiver permissions and background operation.

Milk Tracker - Dairy Management System

Technologies: HTML, CSS, JavaScript, Python, MySQL

Designed a multi-dairy management concept for milk records, fat readings, farmer balances, payment calculations and periodic reports.

CORE STRENGTHS

Problem solving | Analytical thinking | Quick learning | Team collaboration | Adaptability
